Superior experience in path engineering, security Solutions, installation services and troubleshooting.

With over 10 years in the wired and wireless telecommunications industry, Backhaul Engineering has the knowledge and hands-on experience to assist their customers in succeeding with their telecommunications goals. Our certified engineers and field technicians have the skills, training and tools they need to perform their tasks efficiently and effectively.

Combining our expertise in wireless communications and network integration with security systems and access control has resulted in a single-source company that can offer the complete technology package. Every system engineered and installed is guaranteed to work seamlessly with your existing infrastructure, be secure, robust and perform as specified.

The key to Backhaul Engineering's success has been the experience in the field, training by the manufacturers along with the years of accumulated, documented collective knowledge from every manufacturer and industry professional that Backhaul Engineering has worked with over the years. The end result has been faster deployments and quicker resolution to problems. In this way, Backhaul Engineering has excelled, truly creating "added value" for our customers.

Carrier Network Services

Site Surveys and Infrastructure Audits
RF Engineering Services
3G and 4G Technology Integration
DAS Deployments (Indoor/Outdoor)
System Upgrades and Programming
Line and Antenna Installation
Troubleshooting
Emergency Dispatch

Microwave Backhaul Services

Wireless Communications to 10Gb
Microwave Backhaul Design
Point-to-Point and Mesh Networks
Mobile Wireless Networks
Network Integration and Testing
Installation, Pathing, Programming
Antenna Mount Installation
Tower Structure Installation

Access Control & Security

Business & Government Solutions
Access Control Systems
Surveillance Cameras
Analytics Software
Digital Off-Site Storage
Complete Network Integration
System Audits
Threat Assessment
